

## Research Collaboration Opportunity

### Title

#### **Anti-inflammatory/anti-cancer Antibody Therapeutic for Co-development**

**Network Immunology Inc.  
(Vancouver, Canada)**

### Therapeutic Area

Inflammatory bowel disease (pre-clinical efficacy data) and expected application to other inflammatory diseases including inflammatory cancers.

### Description

An immunotherapy based on co-selection using a pair of complementary antibodies (i.e. anti-foreign and anti-anti-self antibodies) inducing tolerance to an inflammatory response.

### Research stage

Pre-clinical development / pre-clinical toxicology.

### Types of collaborations

Early licensing with Pharma for development through clinical phases.

### IP Status

US Provisional applications filed for lead technology. 4 PCTs filed for secondary (vaccination) technology.

### Relevant publications
